Additional ANSYS Modules
January 2012

eCADFEM® Engineering Software on Demand

Dear eCADFEM customer,

During the 12-months maintenance period, you can easily expand the simulation capabilities of your eCADFEM Software by returning this page as PDF-document by email or sending it by fax. The activation of the additionally requested modules usually takes a few working days and is confirmed by email. Actual pricing and conditions at www.ecadfem.com.

If you do not have current maintenance (*TECS = Technical Enhancements and Customer Support) for your eCADFEM account, we would be happy to introduce you our offer for reactivating the TECS, to have further modules activated. Please note that a Start-Up Fee of 250 EUR for the licensing software will be invoiced in addition to the reactivation contingent.

Best regards,
CADFEM GmbH

Activation for Modules at no charge (within the 12-months TECS* period)
